BEST AVAILABLE IMAGES

Defective images within this document are accurate representations of the original documents submitted by the applicant.

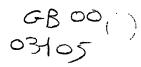

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

IMAGES ARE BEST AVAILABLE COPY.

As rescanning documents will not correct images, please do not report the images to the Image Problem Mailbox.

PRIORITY DOCUMENT

SUBMITTED OR TRANSMITTED IN COMPLIANCE WITH RULE 17.1(a) OR (b)

HECD 28 SEPTOMOGEOPLE

WIEP Patent Office PCT

Concept House

Cardiff Road

Newport

South Wales

NP10 800

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

Warning

After an Application for a Patent has been filed, the Comptroller of the Patent Office will consider whether Publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a Patent abroad without first getting written from the Patent Office unless an Application has been filed at least 6 weeks beforehand in the United Kingdom for a Patent for the same invention and either no direction prohibiting Publication or communication has been given, or any such direction has been revoked.

Carrier Mount

The present invention relates to a carrier mount and particularly to a carrier mount for personal effects such as personal electronic apparatus including, but not limited to, mobile phones, personal stereo players and other audio apparatus to be used when exercising on exercise apparatus.

Personal disc and tape players are known which are provided with means of a attachment to the person of a user. Likewise, mobile phone carriers are well known. Such arrangements are often used during exercise. Such players and carriers are typically clipped to a users belt or waistband.

15

20

25

10

5

An improved arrangement has now been devised.

According to a first aspect, the invention provides a carrier mount for a personal electronic device, which carrier mount comprises:

- i) a pouch shaped and dimensioned to hold the device, and having a opening through which the device may be introduced into the interior of the pouch; and,
- ii) securing means for releasably securing the pouch to a frame member comprising exercise apparatus, the securing means including a collar arranged to secure around the frame member.

30

The invention enables the device (e.g. mobile phone, audio player, etc) to be securely attached to the frame of an exercise machine (such as a jogging machine or a cycle frame) rather than attached to the person of the user. This enables the controls of the device to be accessed more conveniently during exercise (and, particularly for disc players, track jumping during vigorous exercise to be reduced or prevented). The carrier mount also exhibits further advantageous features as described herein.

10

5

The pouch is preferably flexible, and/or of water resistant or waterproof material. Desirably the pouch is padded or quilted to minimise the risk of impact or shock damage to the electronic device.

15

Closure means is preferably provided for substantially closing the mouth of the pouch when the device is received in the interior of the pouch. The closure means may comprise zipper arrangement or, alternatively any other means of holding the mouth of the pouch in a closed condition.

20

25

The pouch is preferably provided with a further pocket either internally or, more preferably externally of the pouch. The pocket is beneficially sealable, typically by means of a zipper arrangement or the like.

30

Means is preferably provided for permitting an electrical connection lead (for headphones, earplugs or the like) to extend into the interior of the pouch when the mouth is substantially closed. In one embodiment this may be

achieved by the closure means for closing the mouth being configured to define or permit a relatively small aperture or gap permitting the connection lead to extend therethrough. In an alternative embodiment an aperture preformed in the pouch may perform this function.

The collar portion of the securing means is preferably arranged to be positioned adjacent a wall of the pouch. Means is preferably provided for ensuring a tight fit of the collar about the tubular frame element of the exercise apparatus. The collar is preferably therefore tightenable about the tubular frame element, and also preferably subsequently loosenable to permit removal of the securing means from the tubular frame.

15

10

5

In one embodiment, the securing means may comprise a rigid or spring tightenable collar bracket (which may be a split collar), desirably having means for selectively altering the effective collar diameter to permit tightening and/or loosening.

. 25

30

20

In an alternative embodiment, the securing means may comprise a flexible element (such as a length of webbing or the like) arranged to pass over the tubular frame element. Typically in such an embodiment the flexible element length will be connected proximate a first end to the pouch and releasably connected proximate a second end to the pouch. The releasable connection will beneficially be by means of a quick release fastening arrangement, such as a popper, stud or VELCRO type connection.

permitting the split collar 7 to be located around a tubular frame member of a selected exercise apparatus. The collar is then contracted by manual manipulation of actuator 7 to contract and clamp securely on the tubular frame element of the exercise apparatus. Other collar arrangements are envisaged (such as a flexible web material length passing against the frame member), however the secure clamping of the expandable/contractible collar is preferred.

10

.15

5

The carrier mount of the invention enables a user to securely mount audio apparatus to exercise apparatus, whilst enabling unfettered use as normal. The waterproof (or at least water resistant) skin of the pouch is particularly useful for gym situations in which perspiration is particularly prevalent. The padded or quilted nature of the pouch also guards against shock or impact damage to the audio apparatus.

20

25

It will be appreciated that the invention has been described in an exemplary embodiment for use with an audio device. It will however be readily apparent that the invention encompasses use with other devices, particularly other personal electronic devices such as mobile phones and the like.
